Since 1958, Double-Grip® Cord Clamp from Briggs has given over 97,000,000 Babies a Healthy Start.

Trust the Cord Clamp 97,000,000 Babies Have Proven Effective

Early every baby born in the United States since 1958 began life wearing a Double-Grip® Umbilical Cord Clamp from Briggs. That’s a very powerful message, one that proves commitment to the safe delivery of 97,000,000 lives and commitment to the medical community to deliver unprecedented reliability.

The Briggs Cord Clamp is without equal and has been used successfully for 40 years...millions of times. This precision-engineered cord clamp has earned its reputation for perfection.

From the beginning, we understood the risks and achieved a quality inspection system that helps prevent problems right from the start.

Briggs personnel created the design and developed the molds that produce the Briggs Cord Clamp.

Briggs sophisticated computer-based vision system checks every device. If the clamp does not meet 100% of the inspection criteria, the clamp is discarded.

Ligation tests measure the force of the clamp to help ensure a perfect connection. Briggs follows the most stringent testing procedures because we will not take a chance – not when the life of a newborn is at stake.

Don’t take the risk with an unproven product!

Choose the Double Grip® Umbilical Cord Clamp – the name and product you can trust.

Double-Grip® Umbilical Cord Clamp from Briggs

- **Protected Closure** maintains tight seal and is designed to prevent accidental opening.
- **Dual Gripping Surfaces** apply constant pressure on any size cord until dry.
- **Hinge Guard** confines cord between serrated jaws to eliminate movement.
